

LOCAL SOLUTIONS, LASTING RESULTS

ANNUAL REPORT
2024

At IntraHealth, we focus on health workers, because without them, health care doesn't happen.

We join forces with national and subnational governments, local partners, civil society organizations, donors, and the private sector to **cultivate local solutions with lasting results**.

In 2024, IntraHealth became a subsidiary of **Global Communities**, a combination that enables us to multiply our collective impact, create operational efficiencies and agility, and better meet the growing and evolving challenges in global health, humanitarian response, and development.

IntraHealth's programming and expertise in areas such as health workforce, data science, and local capacity-strengthening allows Global Communities to expand and further integrate its global health, food systems, and humanitarian assistance efforts. Together, we're working to meet the changing needs of the countries we serve and **ensure sustainable, locally led development**.

2024 AT-A-GLANCE

KEY FOCUS AREAS

Health workforce development

Local capacity-strengthening

Maternal, newborn, & child health + family planning + nutrition

Digital health & data science

HIV/AIDS

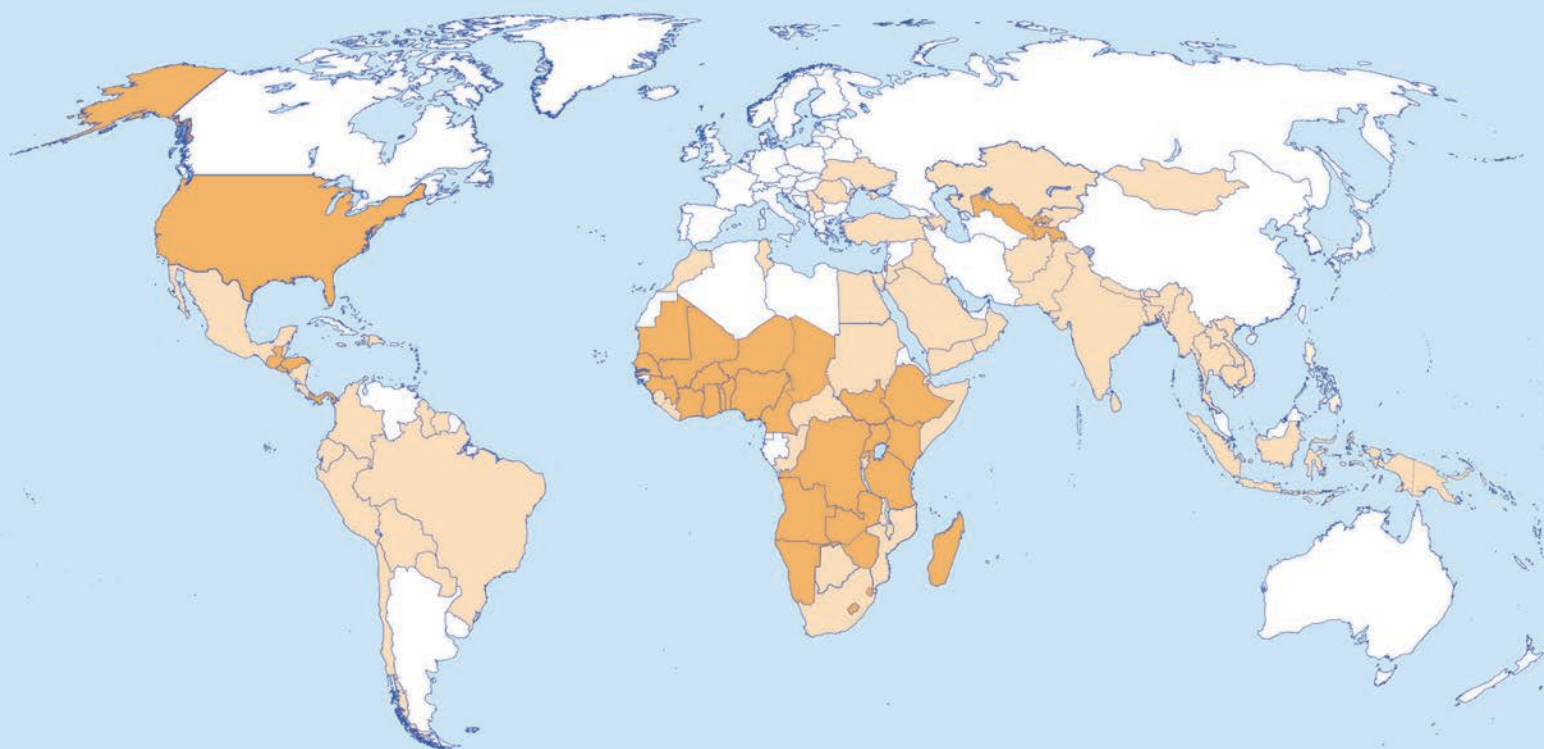

Health systems strengthening

Noncommunicable diseases

FEATURED PROGRAMS

A health worker speaks with a youth center group as part of The Challenge Initiative. Photo by Trevor Snapp for IntraHealth International.

The Challenge Initiative (TCI) and INSPIRE

IntraHealth supports these two investment programs—funded by the Bill & Melinda Gates Foundation—that are working synergistically to advance uptake of maternal, newborn, and child health (MNCH) and family planning (FP) services throughout Francophone West Africa. TCI concentrates on the urban poor through a demand-driven model that encourages local governments to lead implementation of high-impact practices and mobilize their own resources for FP. INSPIRE focuses on reducing maternal and neonatal mortality by scaling up a client-centered model for integrating MNCH, nutrition, and postpartum FP services. In 2024, the 29 TCI-supported cities added 182,426 FP users. The 600+ health facilities implementing the INSPIRE model have seen a 275% increase in postpartum FP use and a 380% increase in well-baby visits for growth monitoring.

Classroom to Care (C2C)

The C2C project's investments lay the foundation for a more resilient health workforce, ready to meet maternal and newborn health challenges in underserved communities across Mali, Niger, and Senegal. With funding from Takeda Pharmaceutical Company, C2C supports 12 private health training institutions in the three countries to implement

a competency-based approach that considers population and student needs and to partner effectively with the public sector. The project is also helping the schools establish up-to-date skills labs and clinical practicum sites and develop eLearning platforms for access to educational resources and self-training. At the end of the project's third year, 7,046 nursing and midwifery students—74% of whom are women—are benefitting from updated curricula adapted to local clinical practice.

Frontline Health Workers Coalition

Participants at a Frontline Health Workers Coalition roundtable, United Nations General Assembly.

IntraHealth hosts the Frontline Health Workers Coalition, the only global alliance advocating for all cadres of health workers, from hospitals to health centers to the last mile. Our work shows the return on investment in health workers, influencing the practices and actions of policy- and other decision-makers to effect lasting impact in global health. Key Coalition achievements during 2024 included collaborating to convene the inaugural Africa Health Workforce Investment Forum—which brought 150 decision-makers together to obtain consensus and commitments on addressing Africa's severe health workforce shortage—and mobilizing participation in the annual World Health Worker Week advocacy campaign, which earned an estimated 95 million social media impressions across the globe.

Advancing HIV & AIDS Epidemic Control

A client and his treatment supporter, during a facility visit for ART refill in South Sudan. Photo by Achan Gladys for IntraHealth International.

Through this critical program funded by the US Agency for International Development, IntraHealth builds on nearly two decades of partnerships to support South Sudan's efforts to address HIV & AIDS and improve access to health services amid conflict, disease outbreaks, and refugee crises. This includes working with the Ministry of Health to improve the skills of health workers, training community outreach volunteers, and strengthening local capacity and resilience to deliver comprehensive HIV/AIDS services, with free antiretroviral therapy for people living with HIV. Since 2009, USAID-funded programs led by IntraHealth have provided over 650,000 people in South Sudan with HIV counseling and testing services.

INTRAHEALTH FINANCIALS

FOR THE PERIOD

JUNE 30, 2023 - SEPTEMBER 30, 2024

FY24

Revenue	57.8
Expenses	50.6
Year End Operating Results^A	0.6
Changes in Net Assets	7.2
Less Changes in Net Assets with Donor Restrictions	6.6
Total Net Assets^B	13.0
Without Donor Restrictions	5.8
With Donor Restrictions	7.2
Liquidity/Current Ratio	3.2
Program Services & Program Support^C	80%
General & Administration	16%
Bids & Proposals & Fundraising	4%

Revenue, Expenses, Year End Operating Results and Net Assets are presented in millions. In FY2024 IntraHealth changed its fiscal year; therefore, presented numbers are for the 15-month period June 30, 2023-September 30, 2024.

^A Year End Operating Results exclude Net Assets With Donor Restrictions.

^B Net Assets and changes therein are classified and reported as: a) Without Donor Restrictions - operating reserves available for use in general operations; b) With Donor Restrictions - Contributions restricted by donors reported here if the restrictions expire in the reporting period in which the revenue is recognized.

^C Program Services & Program Support includes \$3,263,484 in program support costs during the year ended September 30, 2024.
