The future of global health starts here.

IntraHealth
INTERNATIONAL
Because Health Workers Save Lives.

At IntraHealth, we focus on health workers, because without them, health care doesn't happen.

We join forces with national and subnational governments, local partners, civil society organizations, national health associations, donors, and the private sector to cultivate local solutions with lasting results. IntraHealth is a subsidiary of **Global Communities**, integrating a broad range of international health expertise across the humanitarian and sustainable development sectors. Together, we envision a world where crises give way to resilience.
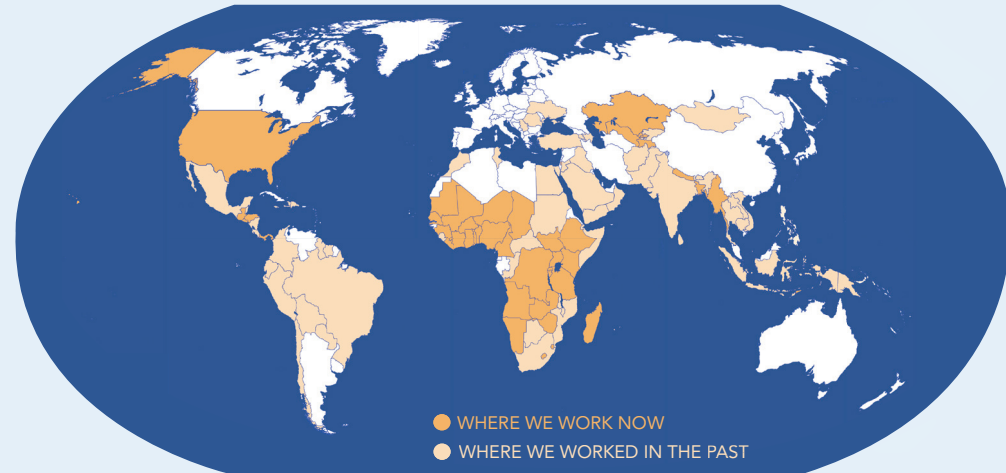

OUR MISSION

Improve the performance of health workers and strengthen the systems in which they work.

OUR VISION

Everyone everywhere has the health care they need to thrive.

● WHERE WE WORK NOW
● WHERE WE WORKED IN THE PAST

WHAT WE DO

- Health workforce development
- Health systems strengthening
- Local capacity-strengthening
- Digital health & data science
- Global health security
- Community health services

- HIV/AIDS
- Family planning & reproductive health
- Maternal, newborn, & child health
- Noncommunicable diseases
- Nutrition
- Gender equality in health care

"**IntraHealth's approach is the best because it is based on local human resources.**

You could have brought Americans here to do this, but you said 'No—we're going to help you develop your own human resources.'

So now you're not only taking care of patients, you're improving the overall quality of care in Mali.

Outside of IntraHealth, no other NGO has done that."

—Dr. Kalilou Outtara, obstetric surgeon and master trainer, Kayes, Mali
